3rd LIST OF PLANTS

offered by the

HORTUS BOTANICUS VOMERENSIS

C. Sprenger. Naples-Vomero. Italy.

Bibliotheek der Landbouw Hogeschool WAGENINGEN

Notices and Conditions:

Orders from unknown Correspondents must invariably be accompanied by remittence.
Prices are quoted in Francs. 1 Franc about 9 1/2 d. — or 5 Francs = 4 Shilling or. — 25 Francs = 1 £. Sterling.
Terms of payment 60 days from date of invoice.
I cannot allow any discount.
Orders booked in strict rotation.
Commissions promptly despatched.
I send out all plants at the risk of the purchaser.
For my horticultural nomenclature and forms originating in my garden I can guarantee the genuineness.
I decline responsability for the unconditional correctness of the botanical names of new of rare species. In doubtful questions the first botanical authorities must decide.
In case receipts or invoice are not received within 10 days. I would request that the order should be repeated, as letters are frequently lost.
Special offers of important plants are only valid for 1 month and are subject to being sold out.
Price lists N.os 2, 3, 4 and 5. Autumn 1906 are valid till the publication of the new lists in the autumn 1907.
My friends, by ordering, acknowledge the above conditions of sale.

	Quantity Les:	Ftancs
Angophora lanceolata Car. A tall arborescent shrub, near Eucalyptus from Australia, hardy at Naples, evergreen with large umbells of fine white flowers	ea	2
Anthericum yeddöense Maxim. A beautiful little perennial species with spikes of white flowers in July. From higher regions of Japan, it will be perhaps hardy in England . . .	ea	3
Arctotis regalis hort. Spr. A new very fine riche-flowering hybrid Arctotis from my garden between Arct. Aureola × grandis. It forms compact bushes with lyrate silvery leaves and covered with silvery-white flowers which are autwarts pink. The flowers are very fine like those of grandis. But always opened, much nobler and gracefuller also distingued by an larger yellow ring. The plants is perennial with wooden stems and flowers here about all the year round. It is a very fine flowering plant, created for pot culture and borders or corners!	ea	10
Arctotis vomerensis hort Spr. A fine hybrid between Arct. aspera × Aureola. Perennial with wooden stems, lyrate, ash-coloured leaves, fine white flowers and crimson bottoms. It flowers richly here quite all the year round	ea	10
Asarum caulescens Maxim. Very interesting perennial species from the mountains of Japan with large reniform dark-green leaves and large brownish-purple flowers in spring. .	ea	5
Aster sericeus Vens. Charming dwarf Autumn.-Aster from the South of U.S.America, dwarf bushy much graceful ramified, with silvery small leaves and plenty of purple flower heads! This aster is one of my best plants in the garden	ea	10
Bacharis mucronata H. B. A splendid shrub from the higher		

	Quantity Les:	Francs
mountains of Mexico, evergreen covered with umbells of large clusters white flowers. One of the best and finest flowering pot and greenhouse plants. Never enough praised. Hardy in my garden it will prove perhaps also hardy in England and Ireland	ea	5
Carlina acaulis caulescens.		
Most interesting variety of the well known C. acaulis with enormous flower heads on tall stalks. A very good rock plant always welcome . . .	ea	2
Coriaria sinica Maxim.		
Evergreen tall very fine species with round leaves and large clusters of reddish berries. My plants are been collected in the Hupeh-China . . .	ea	5
Culibanus caespitosa Roose.		
A Nolina-like dwarf new plant from the higher mountains of northern Mexico, A new genus never seen before, with a trunk like that of Testudinaria, coloured like the rocks about which its grows. Foliage evergreen abundantly grass-like and large spikes of silvery white flowers. A new yewel for rockgardens, corners and any dry places. Very fine one year old plants in pots	ea	3
Dasylirion lucidum Roose.		
A completely new species from the highest mountains of Mexico, near the snow, dwarf, very bushy with green sharp leaves and tall spikes of whaxy white flowers. Much interesting and probably hardy in England. Nice little one year old plants	ea	2
Erythrina rosea A. Dietr.		
A fine species from Mexico with very large leaves, hardy at Naples. The seeds of my plants have been collected of the higher mountains. My plant is a dwarf shrub, but I saw not yet the flowers which seems are splendid.	ea	5
Eupatorium deltoideum Jacq.		
This fine evergreen shrub from Mexico is here at Naples hardy and flowers richly quite all the year round. The leaves are acute triangulated and the fine pink flowers in large stands covers often the plant entirely, a first class greenhouse and pot plant also as a border and corner plant . . .	ea	5
Gazania Austria hort Spr.		
An other very fine riche-flowering variety with large sulphuryellow flower heads.	ea	3
Gypsophila Arrosti Guss.		
A beautiful Sicilian species, perennial and large leaved, covered in spring and summer with a veil of little white flowers like the well known S. paniculata. Fine perennial for cutting purposes	ea	2
Hemerocallis fulva Cypriana.		
A variety from Hupeh-China, with dull red flowers.	ea	3
Hemerocallis fulcitrina hort Spr.		
The first hybrid of H. fulva x citrina fine coloured and highly interesting	ea	2
Heteropappus hispidus Less.		
Very fine perennial Asterlike hardy summerflowering species from China with large purple flowers. Splendid border and cornerplant, also for cutting purposes	ea	2
Ipomoea stans Cav.		
Perhaps my best this year perennial plant. The seeds of its where colected about 5000 feet in the mountains of northern Mexico. It is a suspending not climbing species with a very large root-stock small leaves and large purple flowers changing to cobaltblue! Perhaps hardy in England, to be cultivated one stony dry places . . .	ea	5
Jasminum Barrelierii Webb.		
(J. odoratissimum Lin.). Evergreen fine shrub with large clusters of yellow sweet - scented flowers, very rare! Hardy at Naples	ea	5

	Quantity Les:	Francs
Juglans australis Grieseb. Tall splendid tree from the mountains of Argentinia. Hardy at Naples and perhaps also in England . . .	ea	5
Kniphofia elmensis hort. Spr. A fine hybrid between Kn. pauciflora and rufa with golden-yellow flowers and pinkish bottoms . , . .	ea	2
Lespedeza floribunda Bunge. Lovely shrub from the Mongolia-China with long splendid purple flower-spikes! magnificent border and cornerplant and fine for cutting! Easely grown	ea	3
Malus Zumii Rehd. (Pyrus Zumii) I received the seeds of this from New York U. S. A. It is said a fine tree with plenty of pink flowers.	ea	2
Miscanthus japonicus Anders. The true japonicus! Japonicus of the gardens is Miscanthus sinensis or: Eulalia sinensis. My plant comes from Japan! It is a most splendid tall evergreen very decorative and beautiful large-leaved grass,somewhat glaucous, quite different of all our varieties of Eulalia sinensis. It likes at a true Saccharum, and bears in August brown coloured, pendulous spikes of flowers. One of the finest grasses for autdoor cultivation	ea	3
Montanoa frutescens Hemsl. Highly interesting very beautiful evergreen shrub from Salto de Agua in Mexico. It is dwarf, well compact, covered in Autumn and Winter with splendid clusters of snowwhite flowers. Hardy at Naples, it will be a first class greenhouse and garden plant .	ea	5
Paederia tomentosa Blume. A lovely climber from Mongolia, tall with large leaves and clusters of little purple yellow-riunned flowers. It is completely hardy at Naples and as the winter of Mongolia in severe probably also hardy in England . .	ea	3
Rhus typhina filicina, hort. Spr. This very hardy and splendid variety comes from seeds of the Rh. typhina laciniata. It is a dwarf compact shrub, early flowering with wonderful fine fernlike leaves. It grows much lesser tall than the old laciniata and it is my finest and best hardy decorative plant of the present season. A fine potplant so lovely as a little ferntree! Only a few plants are ready	ea	10
Salvia lavenduloides H. B. A yewel from Salto de Agua in Mexico dwarf compact bushes, evergreen with darkgreen blue-shaded stalks and leaves and spikes of fine purple flowers in summer, autumn and perhaps in greenhouses also in winter. A very god pot and cornerplant newer cultivated or introduced before ;	ea	5
Stevia clinopodia DC. Very fine erect very compact richeflowering perennial Compositae from Salto de Agua in Mexico, entirely covered in Autumn with umbells of pinkish flowers. Fine pot and garden plant!	ea	2
Tradescantia crassifolia Car: Perennial suspending plant with large heaven-blue flowers all summer round. But also of much botanical interest. I have it from the colder regions of Mexico	ea	2
Vitex trifolia unifoliata Schauer Very rare and splendid variety of the little known V. trifolia from Nippon.It is much hardier as our V. Agnus Castus,an evergreen shrub with round glaucous leaves and spikes of heavenblue lovely flowers in summer. Only 6 large plants are ready	ea	10

	Quantity Les:	Francs
Wistaria sinensis fol. aur. var. Fine variety with golden yellow variegated leaves	ea	5
Zizyphus Giraldi Spr. A tall magnificent tree for gardens and avenues with lucent leaves and covered in autumn with black sweet fruits. The seeds of this splendid tree which is certainly hardy in England have been collected from the late Padre Giraldi in the higher mountains of the Shen-si. Northern China! It has nothing to do with Z. Lotus or sativus. but is a god species of quik and erect growth forming splendid trunks and crowns!	ea	3
Yucca Casertana hort. Spr. (Aloefolia × flexilis) A giant with long, more erect leaves and enormous spikes of pure - white campanulous flowers. One of my finest gardens-hybrids.	ea	5
Xysmalobium undulatum R. Br. Highly interesting Asclepiadeae from Basutoland. Tall perennial, hardy certainly in Ireland and perhaps also in England, with lanceolate undulate leaves and large umbells of Asclepias like greenish-yellow flowers, all the summer round. A fine border and corner-plant and very much desired. I have only 3 plants of this species ready .	ea	15

SOME NEW FRUIT - TREES

	Quantity Les:	Francs
Apricot- tree. " The fertil vernal „ see: list 3 September 1905	ea	2
Pear - tree " Early Orsini „ see: list 3 September 1905	ea	2
Black Brambles . " Theodor Reimers „ see: list 3 September 1905	ea	1
Cherry - tree " Italian Turco „ A giant cherry of very fine tast, blackish crimson red, cordate, ripens in the mountains of Tuscana, where it was discovered, about the first July or earlier. Certainly the largest cherry even seen. 40-45 fruits of this splendid cherry makes one pound! It is like a small plum! The tree grows tall is large-leaved and forms a good trunk. Strong little trees	ea	5
Cherry - tree " Poponcina „ Other splendid new variety from the mountains of Tuscana with very large dark-red cordate fruits of fine tast. Strong little trees. Two first class market cherries	ea	3
Medlar of Japan " Limoncella „ (Eryobotrya japonica) A splendid variety with enormous clusters of large oblonge lemon-shaped and coloured sweet-tasted fruits. A yewel!	ea	5
Medlar of Japan " Monreale „ Also a new splendid Japan medlar with round orange fruits, flavour of vanilla , ...	ea	5
Citrus Japonica " elliptical fruits „. Very fine and interesting variety with oblong elliptical, decorative fruits wich covers quite all the year round the evergreen small tree. It flowers here at Naples 2 times in spring and August and my little trees in small pots are just now covered with snow-white sweet - scented flowers. *Large* ramified trees in pots! A yewel! . .	ea	20
